SOFTWARE DEVELOPER

Experienced and detail-oriented Software Developer with a passion for coding and problem-solving. Adept at collaborating with cross-functional teams to deliver high-quality software solutions. Proven track record of success in full-stack development, backend engineering, or machine learning. Demonstrated ability to streamline development processes, enhance application performance, and meet project deadlines. Seeking a challenging role to contribute technical expertise and innovative thinking in a dynamic environment where my skills in software developer can drive tangible results.

SKILLS

Programming Languages: C++,
Python, JavaScript, TypeScript
Web Development: Xhtml,
Tailwind CSS, React, Node.js,
Next.js,

Database Management: MySQL,
MongoDB
Version Control: Git, GitHub
Agile Development Methodology

Devops: Docker, Jest,
BeautifulSoup, Scrapy,
Linux Administration, Jira

PROFESSIONAL EXPERIENCE

Oracle developer intern | Bank Of Georgia, Tbilisi, Georgia | 12.2021 - 11.2022

- Spearheaded and executed data science initiatives, orchestrating the implementation of machine learning models designed to enhance predictive analytics for user behavior. This strategic initiative yielded a quantifiable improvement, with a discernible increase in model accuracy by 15%.
- Data Scraping and Automation - Bank Of Georgia

Engineered and maintained sophisticated data scraping scripts with a focus on competitive analysis. These scripts automated the extraction of specified data types from diverse sources, fostering efficiency and accuracy in data acquisition processes.

- Cross-Functional Collaboration and Data Integration - Bank Of Georgia

Collaborated seamlessly with cross-functional teams to seamlessly integrate data-driven insights into the fabric of the relevant application or system. This collaboration significantly contributed to enhanced decision-making processes, empowering the organization with actionable intelligence derived from robust data analytics.

Software Developer | OPPA Company, Tbilisi, Georgia | 12.2022 - Present

- Developed and maintained responsive web applications using Next.js, React, TypeScript, and JavaScript, ensuring high performance and scalability.
- Implemented complex UI designs and interactions, collaborating closely with designers and backend developers to achieve project goals.
- Utilized Tailwind CSS, CSS3, and SASS/SCSS to create visually appealing and user-friendly interfaces, following best practices and design guidelines.
- Managed application state using Redux and context API, effectively handling data flow and ensuring a smooth user experience.
- Conducted thorough unit and integration testing using Jest and React Testing Library, identifying and resolving issues early in the development process.
- Actively participated in code reviews, providing constructive feedback to team members and ensuring code quality and consistency.
- Employed web performance optimization techniques, such as code splitting and lazy loading, to enhance the speed and efficiency of web applications.
